SUMMARY

Backend & AI - Data Engineer | Python | Distributed Systems | ETL Pipelines

Designing scalable data ingestion systems, distributed scraping architectures, and production-grade backend services with a strong focus on reliability, observability, and high-throughput automation, integrating Claude and Gemma 4 into the institution.

TECHNICAL SKILLS

- **Languages:** Python (AsyncIO), SQL, C, HTML/CSS
- **Backend & Systems:** Flask, RabbitMQ, REST APIs, Distributed Systems, Fault Tolerance
- **Data Engineering:** ETL Pipelines, Web Scraping, OCR Processing, Data Cleaning, System Design
- **Databases:** MongoDB, MySQL
- **Data & ML:** Pandas, NumPy, Scikit-Learn, NLP, Power BI, Excel
- **Tools:** Git, Linux, Docker, Queue-based Architectures

PROFESSIONAL EXPERIENCE

Provakil (PVKL Technologies)

Jan 2025 – Present

Associate Python Developer

Pune, India

- Designed and deployed distributed scraping systems for large-scale legal datasets, maintaining 99% data availability.
- Built fault-tolerant ETL pipelines using RabbitMQ, retry strategies, and structured logging.
- Implemented asynchronous workflows (AsyncIO) to maximize scraping throughput and reduce latency.
- Engineered modular parsing systems for unstructured formats, reducing data miss rates by 18%.
- Automated document pipelines (PDF to structured data), saving 120+ man-hours per week.

Sharma Enterprises

May 2023 – Nov 2024

Business Analyst (Freelance)

Remote

- Built a Transport Management System (TMS) with Power BI dashboards for real-time logistics tracking.
- Optimized supply chain workflows, improving operational efficiency by 25% through data-driven analysis.

TECHNICAL PROJECTS

Distributed Jobs & Referral Extraction Platform | [GitHub](#)

- Architected a multi-worker scraping system using RabbitMQ for distributed task orchestration.
- Processed 50,000+ profiles to generate 12,000+ high-intent leads using targeted keyword pipelines.
- Implemented checkpointing and deduplication to ensure resumability in case of worker failure.

WiFi MAC-Based Attendance System | [GitHub](#)

- Developed a secure authentication system using MAC-based device tracking over WiFi networks.
- Built Flask backend APIs and MySQL integration for automated attendance capture and logging.

Disease to Ayurvedic Medicine System | [GitHub](#)

- Created an NLP engine using Scikit-Learn to map medical symptoms to Diseases and then provide Ayurvedic formulations.

Mouse Activity Capture System | [GitHub](#)

- Built a low-level event tracking system enabling contextual shortcuts for rapid data access, including algorithm identification from clipboard content, image search, real-time translation, and instant word definitions..

EDUCATION

Kalinga Institute of Industrial Technology

2021 – 2025

B.Tech, Computer Science

CGPA: 7.99/10

CERTIFICATIONS

- **Build Real World AI Applications with Gemini & Imagen** – Google Cloud (2026)
- **Google Data Analytics Professional Certificate** – Coursera (2024)
- **AWS Academy Graduate – Cloud Foundations** – AWS (2024)
- **Data Analysis with Python** – IBM (2024)
- **Digital Business Services Job Simulation** – HSBC / Forage (2024)
- **Advanced SQL & Machine Learning in Python** – 365 Data Science (2024)
